

## A \$12 Donation Feeds 10 Hospitalized Children

### The program:

Coffee 4 Kids is a ministry that supports sick and dying children in a hospital in San Pedro Sula, Honduras. Donations are collected for the coffee and 100% of the profits are then sent back to Honduras to feed the hospitalized children. The food is delivered directly to the children. Honduran college students are the work force: there is no overhead and no waste.

### The Impact:

- 1) Children who never had visitors now have daily visitors.
- 2) Children are getting healthier faster and going home faster.
- 3) The medical staff believes that some children have not died because of their improved nutritional status.
- 4) Children are not dying alone. A college student will stay with the child and family during this difficult time. Support is given.
- 5) Some of the children do not have family with them while hospitalized for several reasons. These children may be abandoned or their parents may not be able to stay with them while in the hospital due to their need to work to support their families or to take care of other children at home.
- 6) Before this program started, the children in this hospital were receiving a ½ cup of beans, 2 very small tortillas, and sometimes a slice of cheese daily. These children are no longer hungry and they do not go to sleep crying from lack of food.
- 7) The gospel of Jesus Christ is shared with the children and their families and many receive this message of salvation and hope as a result.
- 8) Countless people have received Christ through this ministry.

Fundraising goal is a minimum of \$3,000 per month. At this level we are able to serve approximately 300 children twice a day. If you would like to make a tax-deductible donation, please write a check to **Medical Support International Inc.** with the word "Honduras" in the note section. Thank you for helping us feed "our kids"!
